

# Gecko<sup>®</sup> Coatings & Composites

With extensive experience in formulating and manufacturing high-performance repair composites and protective coating systems proven in real-world industrial conditions—Gecko® provides effective solutions for a wide range of maintenance challenges involving equipment, machinery, facilities and structural assets.

Our products are designed to be practical, dependable and safe to apply for, allowing us to support demanding applications while delivering clear advantages that are not commonly found elsewhere, including reduced downtime, lower safety risks and user-friendly application methods.

Choosing Gecko® means investing in more than just a product. A core part of our value is our commitment to offering not only advanced technologies but a complete service experience. From tailor-made technical specifications and onsite training to continuous technical support and post-application assistance, we focus on delivering a comprehensive service package that meets every customer's needs.

## Abrasion-Resistant Coatings

High-performance coatings are engineered to protect metal surfaces from severe wear caused by friction, particle impact and material handling in demanding industrial environments.

## Machinable Metal Repair Coatings

Epoxy-based repair compounds designed to rebuild worn or damaged metal parts and can be machined, drilled or tapped after curing to restore original equipment dimensions.

## Emergency Repair Coatings

Fast-curing repair materials formulated for quick, on-site fixes to leaks, cracks and unexpected equipment failures, minimizing downtime and restoring operation rapidly.

## Coatings for Corrosion, Erosion & Chemical Attack

Advanced protective systems developed to shield surfaces from aggressive corrosion, erosive wear and chemical exposure, extending equipment life in harsh process conditions.

## High-Temperature Coatings

Specialized coatings capable of withstanding extreme thermal environments, providing long-term protection for components exposed to continuous or cyclical high temperatures.

## Erosion-Resistant Coatings for Metal

Durable coatings formulated to resist high-velocity fluid flow, slurry impact and particulate erosion, helping maintain metal thickness and integrity in critical components.

## Crusher Backing Compounds

High-strength, pourable epoxy systems designed to fill cavities behind crusher liners, improving wear distribution, securing wear plates and enhancing crusher performance.

## Urethane Compounds

Flexible, impact-resistant polyurethane materials are used to repair, rebuild and protect rubber, metal and concrete surfaces subjected to abrasion, vibration or movement.

## Accessories

Complementary products such as cleaners, primers, mixing tools and application equipment ensure optimal surface preparation and proper installation of repair and coating systems.

**“Reduce downtime  
and keep your equipment  
running longer”**

# HIGH-PERFORMANCE PRODUCTS FOR EXTREME INDUSTRIAL CONDITIONS

Gecko® is a globally recognized developer and manufacturer of repair composites, protective coatings, and specialty MRO chemicals for the mining, marine, industrial, and energy markets. Our high-performance technologies are engineered to perform in extreme environmental conditions and meet a wide range of demanding application needs across industry.

Since our inception, Gecko® has been committed to delivering advanced solutions that protect, repair, and extend the life of critical equipment and infrastructure.

Our portfolio includes high-strength ceramic-filled coatings, metal repair composites, crusher backing compounds, urethane belt repair systems, corrosion- and chemical-resistant coatings, high-temperature protection systems, heavy-duty cleaner-degreasers, safety solvents, rust inhibitors, specialty maintenance products, primers, and application accessories.

Gecko® focuses strongly on providing durable, user-friendly, and field-proven products—supported by technical service, application training, and real-world maintenance experience ensuring long-lasting performance in the most challenging industrial environments.
